What Is Rapid Contractor Management?

Rapid Contractor Management is Australia's proven and award winning online contractor compliance software ensuring risk levels are controlled and only compliant contractors are used in the workplace.

Rapid Contractor Management is the most efficient and productive way to ensure your contractors are compliant, collect their documentation and ensure they are inducted. Rapid Contractor Management is a fully hosted online software system designed to manage every aspect of contractor operations, from a pre-qualification questionnaire and the collection of licenses and certificates through to worker induction and ongoing performance management.

Rapid Contractor Management enables clients to collect, verify and track all contractor information to ensure compliance with Workplace Health and Safety laws. Companies are able to ensure only compliant and inducted contractors are permitted in the workplace, thus ensuring compliance and reducing risk in the workplace.

What Makes Rapid Contractor Management Different?

Rapid Contractor Management is Australia's pioneer of the online pre-qualifying questionnaire for contractors, thus ensuring contractors are assessed for compliance and level of risk before being engaged to work.

This award winning software system provides seamless and continual lifecycle management of contractors, from registration and assessment for compliance to document control, induction and ongoing performance review.

Rapid Contractor Management sets the standard for contractor e-document tracking. Expired documents lead to suspension of contractor rights preventing exposure of workplaces to hazards posed by uninsured contractors.

The only system with integrated performance review functionality enabling you to benchmark the contractor's performance.

Rapid Global Products Integration

Integration with your existing systems or third party software is available. Rapid Induct can also be combined with other Rapid Global software solutions to create greater efficiencies and perform related tasks:

Rapid Induct software provides the ability to create online induction courses for contractor training. Inductions are able to be completed off-site before a contractor begins work.

Rapid Access software combines identification cards and site access systems such as kiosks or turnstiles to enable secure site entry. All workers swipe in to provide proof of induction before access is granted.

Rapid Visitor Access software uses Rapid Induct to deliver visitor induction and entry authorisation via a touch screen or iPad.

Ask us how Rapid Global can tailor a custom package from our suite of complementary products.

Features

More than just software, Rapid Contractor Management partners with you to achieve your goal of work health safety compliance, incorporating features such as:

- Provides an online accessible system for the management and compliance of contractors through the pre-qualification of credentials, collection and verification of documents, insurances and certificates.
- Provides a method of consultation and collaboration with contractors to ensure overall safety of the workplace is improved, maintained and compliant with WHS laws.
- Allows collection of individual and company documents as required (i.e. licenses and certificates).
- Ensures records relating to contractors are consistently documented and centrally stored.
- Provides a central contractor database to record all contractor communications and track documentation.
- Ensures workplace safety information is accessible 24/7 via online induction and online publication of safety material (accessed via inductee's homepage and contractor portal).
- Automated email reminders let contractors know when documents are about to expire.
- Tracks expiry dates of all collected information, induction and training.
- Is able to include plastic data enabled ID cards with a QR code.
- Able to include Rapid Performance Review for the ongoing management of contractor key performance indicators (KPIs) and assessments.
- Offers 1800 number phone support for learners and administrators.
- Includes ongoing training and technical support for administrators.

Branded login screen designed to suit your company profile.
