## Rapid Visitor Access – More than replacing your visitor sign in book!

Revolutionise the way you welcome visitors and contractors to your site or building. Rapid Visitor Access is available as a touch-screen or tablet solution providing point of entry electronic sign in for all your visitors.

Greet your visitors and contractors with a sign in process that is state of the art technology. Suitable for both manned and unmanned stations, the Rapid Visitor Access system provides point of entry sign in and record of attendance. Safety site induction information and site maps are displayed to each visitor. Visitors select from a list the person they are visiting and the host is notified immediately via SMS and email! Also includes on the spot automated label printing for each visitor.

Rapid Visitor Access ensures you present at your best to every visitor on arrival and is simply the easiest and most affordable way to manage site visitor attendance.

### The Rapid Visitor Access Difference

Rapid Visitor Access utilises our award winning Rapid Induct technology, enabling you to edit your visitor induction course as needed! Need to categorise your visitors and present each type with a different short induction? No problem! Rapid Visitor Access is flexible and can be set up to manage all types of visitors including contractors and employees from other sites.

**Feel confident in managing your visitors in every situation!**

### Rapid Global Products Integration

Rapid Access Systems can also be combined with other Rapid Global software solutions to create greater efficiencies and perform related tasks:

**Rapid Induct** software allows inductions to be completed prior to arrival on site.

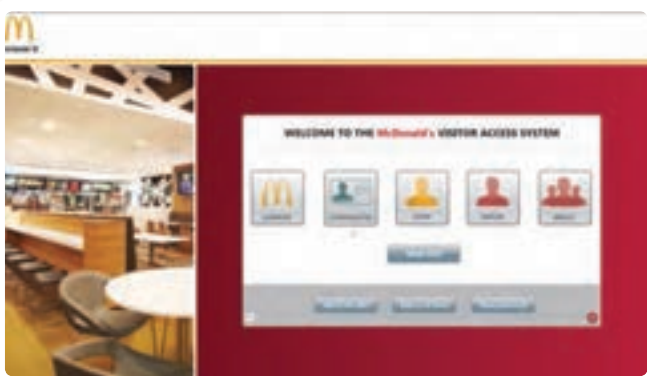

**Rapid Contractor Management** software prevents non-compliant contractors from entering a site. Documents collected in Rapid Contractor Management are tracked and displayed on terminal screens on site. If a document such as a company's insurance has expired then the workers' access to the site is denied.

**Rapid Incident Reporting** software allows a contractor to be included in incident reports or to report an incident from the on site terminal.

**Rapid Permit to Work** software allows a contractor to request permits online prior to arrival on site and then displays permits when signing in to the terminal on site.

## Features

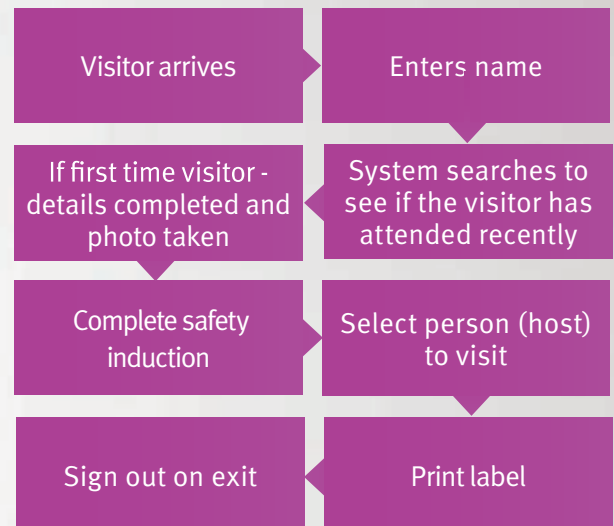

- Visitor sign in and sign out
- Auto SMS and email notification of visitor arrival
- Includes safety induction and site maps
- Instant evacuation list printing and online view
- Touch screen, Ipad and tablet options
- Printed labels or ID cards
